The entire output of the lead mine in Rupnik (sic) is sent to the Soviet Union. There are three smelting furnaces in operation which have a yearly production capacity of 24,000 to 25,000 tons. The lead is formed in 50 kg sheets. Two more furnaces will be constructed by the Soviets. These furnaces will arrive shortly from an unspecified satellite country. The mine is under Soviet management and the entire works are under the formal control of a joint Albanian-Soviet company.
